

Identifying Cognitive Impairment and What Can I do with it?

It is important for health care staff to be able to detect cognitive impairment in older adults. Signs and symptoms of cognitive impairment can be recognized through how older adults perform their tasks or through screening assessments. In this course, participants would learn to identify cognitive impairment through observations and screening assessments and the basic strategies to maximize participation via activities and case studies.

COURSE DETAILS

 **8 Sept 2025**

 **2 pm to 4 pm**

Learning Objectives

- Understand normal aging and cognitive impairment
- Learn about various screening assessments
- Identify cognitive impairment through task observations
- Understand and apply basic strategies on engaging an elder with cognitive impairment using case scenarios

 **Course Fees**
\$250 (incl. GST)

CCTG funding is eligible for 90% funding for Singaporean/Singapore Permanent Resident (PR) and 45% funding for foreigner.

 **Who Should Attend**
Health care staff involved in the care of older adults in setting such as centre based services, home therapy, nursing homes and AAC

 **Method**
Online Via Zoom
